**Subject:** RE: Frank Holten State Park & Making Connections

Hi Mary,

There was a concern from a meeting held with the NAACP President in ESTL and the EJ community rep. concerning the sewage flood water running into the lake where residents fish. When it rains and flooding occurs, the residents are not informed not to fish or even signs placed in the areas as a warning.

Rochelle

Hi Rochelle!

I recall several months ago you had mentioned some issues happening at Frank Holten State Park, but I couldn't remember what they were. Seems like it was something related to water quality in the lake, but I was hoping you could refresh my memory.

On a different note, copied on this email is Tom Heavisides from Illinois Department of Natural Resources. He's working with an NRDA in the area: <https://www.fws.gov/midwest/es/ec/nrda/Sauget/index.html>  
I thought it would be good to connect the two of you.

I had mentioned to Tom about the summit ave wetland as a possible restoration site. I'll be sending Tom some more info about it. Frank Holten also came up; thus the question above.

Mary
